1) Die Vorbohrtiefe  $t_1$  berücksichtigt die Längen  $L_1$  und  $L_3$  nach ASME-Norm, sowie die Anschnittslänge des Gewindebohrers und 1 bis 2 Gewindegänge Sicherheit. Tiefbohren ist erforderlich, wenn Gewindebohrer mit Maximal-Gewindelängen nach ASME B94.9 angewendet werden sollen.

1) The drill depth  $t_1$  takes into account the lengths  $L_1$  and  $L_3$  acc. ASME standards, the chamfer length of the tap and 1-2 threads safety margin. Deep drilling is necessary whenever taps with maximum thread length acc. ASME B94.9 are to be used.

1) La profondeur d'avant-trou  $t_1$  tient compte des longueurs  $L_1$  et  $L_3$  selon norme ASME ainsi que de la longueur d'entrée du taraud et de 1 à 2 filets de sécurité. Le perçage profond est nécessaire pour les cas où les tarauds avec longueurs de peignes maximales selon ASME B94.9 sont utilisés.

1) La profondità del preforo  $t_1$  tiene conto delle lunghezze  $L_1$  e  $L_3$  secondo norma ASME ed anche la lunghezza d'imbocco del maschio da 1 a 2 filetti di sicurezza. La foratura profonda è necessaria se vengono utilizzati maschi con lunghezze filetto massime secondo ASME B94.9.

2) Die Kernlochmaße sind auf Minimallängen nach ASME-Norm aufgebaut. Für Grundlöcher, welche die angegebenen Mindesttiefen t nicht zulassen, sind Sondergewindebohrer erforderlich. Eine bemaßte Grundlochkizze ist zur Beurteilung notwendig.

2) The thread hole dimensions are based on minimal lengths acc. ASME standards. For blind holes which do not permit the indicated minimal depth t, special taps are necessary. A thread hole sketch with full dimensional specifications is necessary for making a decision.

2) Les dimensions d'avant-trou sont calculées à partir des longueurs minimales selon norme ASME. Pour les trous borgnes dont les profondeurs mini ne correspondent pas aux valeurs t indiquées, des tarauds spéciaux sont nécessaires. Dans ce cas nous vous prions de nous envoyer un croquis coté du trou borgne.

2) Le misure del preforo sono calcolate partendo dalle lunghezze minime secondo norma ASME. Per fori ciechi, le cui profondità minime t non sono previste nella tabella, sono necessari maschi speciali. In questo caso Vi preghiamo di inviarci uno schizzo quotato del foro cieco.

1) Die Vorbohrtiefe  $t_1$  berücksichtigt die Längen  $L_1$  und  $L_3$  nach ASME-Norm, sowie die Anschnittslänge des Gewindebohrers und 1 bis 2 Gewindegänge Sicherheit. Tiefbohren ist erforderlich, wenn Gewindebohrer mit Maximal-Gewindelängen nach ASME B94.9 angewendet werden sollen.

1) The drill depth  $t_1$  takes into account the lengths  $L_1$  and  $L_3$  acc. ASME standards, the chamfer length of the tap and 1-2 threads safety margin. Deep drilling is necessary whenever taps with maximum thread length acc. ASME B94.9 are to be used.

1) La profondeur d'avant-trou  $t_1$  tient compte des longueurs  $L_1$  et  $L_3$  selon norme ASME ainsi que de la longueur d'entrée du taraud et de 1 à 2 filets de sécurité. Le perçage profond est nécessaire pour les cas où les tarauds avec longueurs de peignes maximales selon ASME B94.9 sont utilisés.

1) La profondità del preforo  $t_1$  tiene conto delle lunghezze  $L_1$  e  $L_3$  secondo norma ASME ed anche la lunghezza d'imbosso del maschio da 1 a 2 filetti di sicurezza. La foratura profonda è necessaria se vengono utilizzati maschi con lunghezze filetto massime secondo ASME B94.9.

2) Die Kernlochmaße sind auf Minimallängen nach ASME-Norm aufgebaut. Für Grundlöcher, welche die angegebenen Mindesttiefen t nicht zulassen, sind Sondergewindebohrer erforderlich. Eine bemaßte Grundlochkizze ist zur Beurteilung notwendig.

2) The thread hole dimensions are based on minimal lengths acc. ASME standards. For blind holes which do not permit the indicated minimal depth t, special taps are necessary. A thread hole sketch with full dimensional specifications is necessary for making a decision.

2) Les dimensions d'avant-trou sont calculées à partir des longueurs minimales selon norme ASME. Pour les trous borgnes dont les profondeurs mini ne correspondent pas aux valeurs t indiquées, des tarauds spéciaux sont nécessaires. Dans ce cas nous vous prions de nous envoyer un croquis coté du trou borgne.

2) Le misure del preforo sono calcolate partendo dalle lunghezze minime secondo norma ASME. Per fori ciechi, le cui profondità minime t non sono previste nella tabella, sono necessari maschi speciali. In questo caso Vi preghiamo di inviarci uno schizzo quotato del foro cieco.
